

Databricks Guided Activation

Know where you are going, what you will achieve and how to get there with confidence!

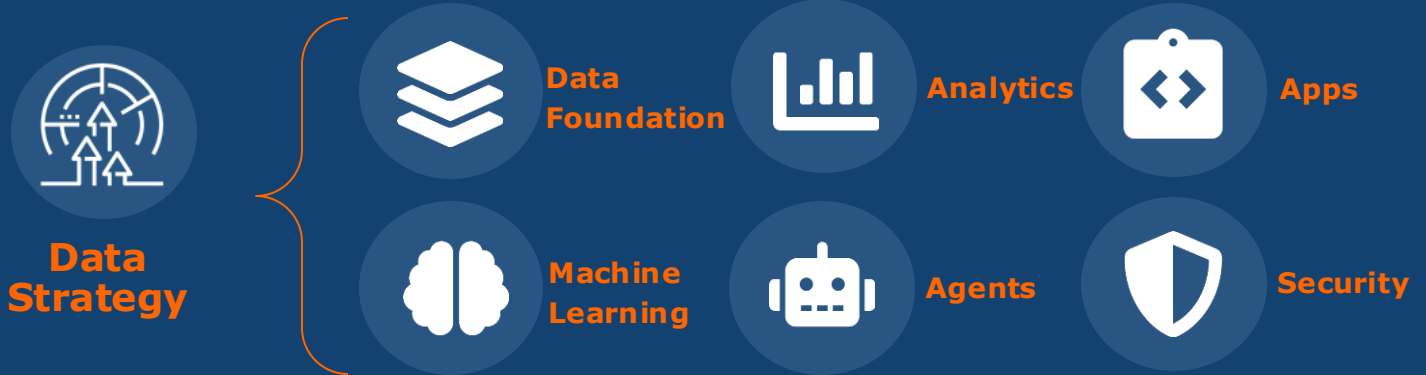

Business Challenge

Organizations are **faced with having to do more with less**, which means they don't always have the time, budget or skill set to **realize their Data & AI vision**.

The Databricks platform provides the infrastructure and capabilities, but getting from point use case ideation to **value realization requires business logic knowledge, deep technical experience, and the bandwidth** to execute against the Data & AI Strategy.

INFINITIVE Value

- 3-4x Faster Time to Value
- Quantified Business Outcomes
- Flexible Delivery Model
- Fit for Purpose Modules

Solution Summary

Infinite's **Guided Activation** allows organizations flexibility on how they build on the Databricks Intelligence Platform either with **hands-on keyboard** support or **over the shoulder** consultation. Modular engagement based on subject matter need and always mapped to your **data strategy & business outcomes**.

Let us prove it...

Complimentary value assessment for TCO and RoI analysis
